

Homework Policy

Costanoa High School

Students are encouraged to do homework. Homework is a great way to catch up on credits towards graduation. A clear arrangement with expectations and due dates should be made with the teacher prior to starting homework; however, the teacher has the discretion to assign credit for student-initiated work.

Our intent is for students to participate in classwork on a regular basis. Students with a pattern of many absences who demonstrate the capacity to complete credit at home will be referred to Independent Studies (exceptions will be approved by the principal).

Students are advised to do homework when it is necessary for them to achieve extra credit for timely graduation. Students planning to transfer to comprehensive high school or go to college or training school are also advised to be in the habit of doing self-directed academic work outside of the classroom.

By Board policy, all students may complete homework during a suspension.
